

Into The Light
By
Cecelia Page

Light exists in the Cosmos. Light is the source of God energy which emanates throughout the Cosmic plan. Within the light God energy emerges in all life.

Within the light the flow of God's love, purity, unity, harmony and balance manifests. Light is the giver of fohatic energy which functions in every cell in the nucleus, atoms and electrons.

Light is the source of being. Light heals us with its purifying rays. Light restores us constantly. The light of God never fails. We need to call the light of God into action.

Let us walk in the light. Let us love the light. Let us be one with the light. Let us be healed by God's light. Let us recognize the light. Let us appreciate the light within us.

Light dissolves darkness. Light restores life. Light is the source of our being on seven planes. Let us live in the light.
