

## **There is a Light**

A human life, as the life of any other creature, starts with birth, that is, with the coming to the Light. The newborn baby begins to learn about the world and to develop his/her senses.

She/he learns how to see, how to hear, how to taste, how to touch, how to tell various colors and shapes. Most of the information he/she receives through her/his eyes, perceiving the light reflected from the objects surrounding her/him. Learning all these things, the child makes his/her first choice.

An eye is a special organ, created by Nature to receive light and the information it carries. Particularly the eyes of a person are two-way channels of light. On the one side it channels the sun and physical surroundings reflecting. On the other, it is a transmitter of the Spiritual Light, the Light coming from the soul into the outer reality.

Our eyes are an indicator of the inner state of our soul. The light of the soul, passing through the prism of our personality, is projecting our inner essence through the eyes. Truly it is said, that the eyes are the mirror of the soul. In all times and in any language there are many epithets and comparisons uncovering the connection between the eyes and the Spiritual Light. Bright, sunny, warm, radiating, fiery, burning—so many different variations and degrees of Light coming from the soul can be transmitted through the human eyes.

Light is Love and Love is Light. That's why we say about someone who is in love—"he/she is shining with happiness", "glowing with love", "radiating love". Love allows the Light of the soul to break through the dense robes of the physical body and to become visible and tangible. Similarly the soul of the child, in the early years, being in harmony with Nature and the Universe,—her pure Light is not yet shrouded by external stratifications. It is for this reason that we naturally have such tender and quivering attitudes toward small children.

The most Light-carrying love is selfless, making it especially super personal. Such people are as small suns, radiating their love equally to all. Their aura glows with a bright light, generates a magnetic pull, drawing near those that surround them, warming and purifying them. Light-carriers help others progress on the path of evolution and human souls often respond to the arising attraction unconsciously. An aspiration develops, to follow such Light—Love, and the follower becomes more luminous.

Our Sun sends Love to all people and to all that is created equally, without making distinctions or restrictions. The love of the Sun in our physical world is shown by Light. Out of all the kingdoms of nature, only the human can alter the nature of Light, dimming it; to transform the Shining Light—Love—into dark radiations of harm, hatred, disharmony and destruction.

All things manifested in our world, any life—is various forms of energy expressed through vibrations of different degrees and frequencies. Light is the manifestation of ethereal (or Spiritual) energy. Hence, all the manifested forms and conditions, visible and perceived by our sense organs, are concentrated or, one might say, light condensed down to a firm condition, for example, such as gold. Under the right conditions, any physical body; even a stone, will radiate Light, proving by this that it consists of light. Light is Love, the Love is Life. Life is eternal and omnipresent, as is Light.
